

PRADNYESH SHEJWAL

AI Product Engineer

Mumbai · Pune, India | workspace.pradnyesh@gmail.com | pradnyesh.vercel.app | github.com/25Pradnyesh
linkedin.com/in/pradnyesh-s | x.com/Pradnyesh_25 | cal.com/pradnyesh

SUMMARY

AI Product Engineer specializing in end-to-end product engineering across modern web applications, scalable backend APIs, and intelligent AI systems. Experienced in architecting and shipping independent products and rapid hackathon prototypes from concept to production. Hands-on experience developing multimodal pipelines, computer vision, NLP, LLMs, and autonomous agent workflows alongside full-stack engineering. **Winner of Monad Blitz Pune.** Currently deepening machine-learning foundations through Andrew Ng's Machine Learning Specialization while expanding Web3 and Ethereum application integration.

EDUCATION

Savitribai Phule Pune University (SPPU) Bachelor of Engineering (B.E.) in Electronics & Computer Engineering Honors: Artificial Intelligence and Machine Learning	2023 – 2027
B.K. Birla College of Arts, Science & Commerce 12th Grade · Science Stream	2022 – 2023
Smt. Kantaben Chandulal Gandhi English School 10th Grade	2020 – 2021

SKILLS

Languages: Python, TypeScript, JavaScript, C++, Java, SQL
Frontend: React, Next.js, Tailwind CSS, Figma
Backend: Node.js, FastAPI, REST APIs
AI / ML: PyTorch, Machine Learning, Computer Vision, NLP, LLMs, Generative AI, AI Agents
Databases: PostgreSQL, Supabase, MongoDB
Web3: Solidity, Ethereum
Tools: Git, Docker
Learning: Andrew Ng — Machine Learning Specialization (in progress)

EXPERIENCE

Full-Stack Developer Independent Builder & Product Development • Architected and shipped end-to-end applications from zero to working product across Next.js, FastAPI, Python, APIs, and databases. • Built intelligent systems with autonomous agent workflows and multimodal extraction pipelines; owned projects from concept through implementation and iteration. Skills: Product Engineering, Rapid Prototyping, Full-Stack Development, System Architecture	03.2025 – Present
AI Developer AI Engineering — Projects & Research • Built intelligent systems using LLMs, computer vision, NLP, multimodal processing, and AI agents; developed Travel AI's extraction pipelines. • Engineered prompt-engineering workflows and integrated machine-learning inference into production applications; strengthening ML fundamentals via Andrew Ng's Machine Learning Specialization. Skills: Generative AI, LLMs, AI Agents, Computer Vision, NLP, Python, FastAPI, PyTorch, Machine Learning	06.2025 – Present
Design Engineer Design Engineering — Projects & Product Development • Architected production-grade interfaces, interaction patterns, and component-driven design systems for responsive applications. • Bridged design and frontend engineering through high-fidelity implementation, responsive architecture, accessibility, motion, and visual hierarchy. Skills: UI/UX Design, Design Systems, Figma, Interaction Design, Motion Design, Frontend Engineering	07.2025 – Present

PROJECTS

Travel AI — AI Location Extraction & Mapping System · [GitHub](#)

07.2026 – Present

- Built a multimodal extraction pipeline combining computer vision, NLP, contextual language models, semantic parsing, and geographic reasoning to identify destinations, landmarks, and geographic context from social-media reels and captions.
- Developed location extraction, candidate resolution, verification, and structured transformation workflows converting unstructured travel content into usable geographic data; **processed 100+ reels during testing**.
- Integrated Google Maps and geospatial services to cluster extracted locations, establish spatial relationships, and generate interactive routes and travel representations.

Skills: Python, FastAPI, Next.js, TypeScript, Computer Vision, NLP, LLMs, Google Maps API, REST APIs

Penguin Protocol — Decentralized AI Investment Syndicate · [GitHub](#)

07.2026

WINNER — Monad Blitz Pune · Built in under 8 hours

- Built the frontend and core product logic for the decentralized AI investment platform.
- Implemented AI-assisted investment workflows around agent analysis, market context, confidence voting, and on-chain interactions.
- Took the project from concept to functional prototype in under 8 hours and won Monad Blitz Pune.

Skills: React, Next.js, TypeScript, Web3, Blockchain, Smart Contracts, AI/LLMs, Wallet Integration, API Integration

Reclaim — AI-Powered Phone-Use Management App · [GitHub](#)

10.2025

WeMakeDevs FutureStack GenAI Hackathon · Shipped in 6 days

- Built a full-stack application designed to transform phone-usage data into contextual behavioral insights and personalized interventions.
- Integrated Llama through Cerebras API with a Supabase-backed application and data layer; built and shipped the working prototype in 6 days.

Skills: Next.js 14, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Cerebras API, Llama, Generative AI, REST APIs

AI + IoT Vertical Farming System — Final Year Project · [GitHub](#)

2026

Environmental monitoring, automation, and plant-disease detection

- Built and trained a six-class plant disease image-classification model using MobileNetV3 transfer learning. Prepared and standardized a 600-image dataset into six plant-health classes at 224×224 resolution, split into 420 training, 90 validation, and 90 test images.
- Trained and evaluated the model, then integrated inference into a FastAPI backend and application workflow; **processed 500+ images during testing**.
- Integrated environmental monitoring and automation using temperature, humidity, soil moisture, and light-intensity sensing with the application layer.

Hardware: STM32, ESP32-CAM, environmental sensors · **Software:** Python, FastAPI, React Native / Expo, MQTT, PostgreSQL / Supabase, PyTorch / MobileNetV3

VoiceAds — AI Customer Feedback to Ad Intelligence · [Live](#)

2026

AIBoomi Startup Weekend Pune

- Built and shipped working prototype in under 24 hours at AIBoomi Startup Weekend Pune. Developed an LLM-driven semantic-analysis workflow extracting customer sentiment, recurring language, pain points, and product themes into structured advertising content.

Skills: Next.js, React, TypeScript, LLMs, NLP, Semantic Analysis, Prompt Engineering, Generative AI

Design Resource Vault — Curated Design & UI Discovery Platform · [Live](#)

08.2026

- Built a centralized discovery platform for design systems, component patterns, design tokens, typography references, and UI tooling with structured categorization and client-side filtering.

Skills: Next.js, TypeScript, Tailwind CSS, Framer Motion, Design Systems, UI/UX

AWARDS & RECOGNITION

- **Monad Blitz Pune — Winner:** Penguin Protocol · Built in under 8 hours (07.2026)
- **WeMakeDevs FutureStack GenAI Hackathon:** Reclaim · Working prototype built in 6 days (10.2025)
- **AIBoomi Startup Weekend — Pune:** VoiceAds · Working prototype built in under 24 hours (2026)
- **Andrew Ng — Machine Learning Specialization:** Currently pursuing
